SUMMARY

MCA graduate with a strong foundation in Java, object-oriented programming, Spring Boot, and REST API development. Eager to begin a career as a Java Developer and contribute to impactful backend projects. Possesses hands-on experience building microservices-based applications and RESTful APIs through academic and personal projects. Passionate about writing clean, efficient, and maintainable code while continuously learning new technologies.

TECHNICAL SKILLS

Languages: Core Java (OOPs, Collections, String Handling, Exception Handling, Multithreading), Java 8, SQL

Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Microservices Architecture, JUnit 5

API & Security: REST API Development, API Gateway, JWT Authentication, Role-Based Access Control, Swagger, Postman

Databases: MySQL, Oracle

Web Technologies: HTML, CSS, JavaScript, Thyme leaf

Tools: Git, Maven, STS (Spring Tool Suite)

PROJECTS

Photo Forgery Detection | Tech: *Python, Image Processing, Algorithm Design*

Academic Project | Jan 2023 – Jun 2023 | Grade: A+

- Built a system to detect image forgery by identifying regions that were copied and pasted within the same image
- Applied image comparison algorithms to locate duplicated areas, even when slight modifications or transformations were present
- Enhanced problem-solving ability by optimising detection algorithms for greater accuracy and better overall performance
- Gained practical experience in algorithm design, image data processing, and addressing real-world technical challenges

Warehouse Based B2C Ecommerce Application | Tech: *Java, Spring Boot, Microservices, MySQL, React*

- Architected a microservices-based backend for product catalog, order management, and warehouse inventory modules
- Designed REST APIs for Product and Category modules supporting CRUD operations, pagination, sorting, and filtering
- Integrated JWT authentication and role-based access control (RBAC) to secure all API endpoints effectively
- Applied layered architecture (Controller, Service, Repository) adhering to SOLID principles for clean code structure
- Utilised Spring Data JPA and Hibernate for ORM-based database interactions with MySQL, ensuring efficient data management
- Enforced bean validation and global exception handling to deliver robust and consistent API responses

Counsellor Portal Application | Tech: *Java, Spring Boot, MySQL, Thyme leaf*

- Constructed a web-based enquiry management system with CRUD operations, follow-up tracking, and status management
- Developed RESTful APIs using Spring Boot and MySQL, following layered architecture for clean separation of concerns
- Established a normalised relational database schema in MySQL, integrated with Spring Data JPA for efficient data persistence
- Created a reporting dashboard to display enquiry statistics and produce summary reports for management use

EDUCATION

Master of Computer Applications (MCA)

Fakir Mohan University, Balasore

Nov 2021 – July 2023 | CGPA: 7.0 | Final Project Grade: A+

Bachelor of Science (BSc)

Utkal University, Bhubaneswar

July 2018 – August 2021 | Percentage: 64%

LANGUAGES KNOWN

English

Hindi
